

Red Light Green Light

BY: DAISY MUNOZ

Red Light Green Light is a task manager that helps you focus on which tasks you should be working on. It allows you to create a list and select an option based on the priority it has in your life.

- Red is for a task you should currently be working on.
- Orange is for a task that you should start working on, but you still have time.
- Green is for tasks that you have a while to prepare for, but don't want to forget.
